South Shore Children's Dentistry and Orthodontics is a family of pediatric and orthodontic dental practices. This trio offers a warm, compassionate patient experience by recognizing that no two children are alike. The doctors and staff truly love what they do—and it shows. Dr. Kristine Grazioso, Dr. Anne Kuczma, and Dr. Paul Fitzgerald share their thoughts on this unique collaboration.

How did this family of practices evolve?

Our story began back on the campus of Boston College. Dr. Kristine Grazioso and Dr. Paul Fitzgerald went to BC for their undergraduate degrees and eventually took parallel paths where Dr. Grazioso became a pediatric dentist and Dr. Fitzgerald pursued orthodontics. Dr. Grazioso founded South Shore Children's Dentistry in Cohasset and Dr. Fitzgerald launched Hingham Orthodontics, and a strong natural collaboration began.

About 10 years ago, Dr. Grazioso and Dr. Fitzgerald met Dr. Anne Kuczma. After her pediatric dental residency at Boston Children's Hospital/Harvard School of Dental Medicine, Dr. Kuczma joined Dr. Grazioso in Cohasset. It became apparent that these three doctors had more to offer to patients so Abington Children's Dentistry and Orthodontics was born.

How do your practices treat and why are they the best?

We believe we are so much more than a typical dental office. Not only do we specialize in the care and development of children's oral needs, we form deep relationships with each family. We treat children from birth through their college years. With many moms on our staffs, we are proud to provide "Children's Dentistry...with a Mother's Touch." Our mission is to raise a generation of children who look forward to going to the dentist rather than fear it. We are committed to giving back to the community through pro bono work, education in the school systems and mission work both locally and internationally. With our investments in leading edge technology, we are proud to offer our patients the highest quality care using the best materials and techniques in the warmest, friendliest environment possible.

If future patients would like to reach you, how should they do so?

We welcome families to learn more about our practices! Our websites are excellent sources of information, so please visit us!
